SERVICES

DESIGN

We work with the customer during the product design phase to determine the best manufacturing options for the product and its components.

PROCUREMENT OF COMPONENTS AND MATERIALS

- We buy all of the components and materials required for the products.
- We make purchases from high-quality suppliers who have been approved for our system.

ASSEMBLY

- Circuit board configurations
- Mechanical assembly
- Varnishing

TESTING AND PROGRAMMING

PROTOSERIES 0 SERIES PRODUCTION SETS

PACKAGING AND DELIVERIES

- Buffering and timings
- Deliveries directly to end customers

ABOUT US

1991 Founded, AK-Elektro Ky

2009 **Certified quality system ISO 9001:2000**

Our customers are companies in a wide range of sectors, from manufacturing to companies making household products.

FLEXIBLE PRODUCTION

- The production lines adapt from small batches to large ones and from single deliveries to repetitive manufacturing units.
- ESD-protected premises.

LOW MIX - HIGH VOLUME

- **Cost efficiency:** Large production batches allow costs to be spread over more units, which lowers costs.
- **Quality:** A repeatable process leads to better quality control.
- **Fast delivery:** Ready warehouses or efficient production lines enable fast deliveries

MACHINERY

- Laying line for surface connection components (Siemens)
- Wave soldering line (Ersa)
- Circuit board varnishing device (PVA)
